

INTEROFFICE MEMORANDUM

DATE: October 11, 1984

TO: BRIDGE DESIGN PERSONNEL
FROM: Veral Pinkerton, Bridge Engineer
SUBJECT: Test Pile Lengths

The contractors through the Associated General Contractors Bridge Committee has asked that **concrete test piles** be specified in **five foot** increments as often as it is possible. They hope to talk the concrete pile producers into stocking a limited number of piles for this purpose. You should consider this request and follow it when practical.
